Lincoln logs design instructions

We'd love your help. Let us know what's wrong with this preview of LINCOLN LOGS Building Manual by Dylan Dawson. (4.8)4.8 stars out of 4 reviews4 reviews Notice unusual marketplace activity?Report For generations, children have loved playing with LINCOLN LOGS building sets and discovering just how inventive they can be. The brainchild of John Lloyd Wright (son of the famous architect), these interlocking logs open up endless possibilities for kids: anything a child can dream up, he or she can build. Plus, every time kids place the logs in position, they're enhancing their manual dexterity. But there is one thing this wonderful plaything has never had: a detailed manual that explains exactly how to create specific projects. Finally, it's here, complete with an interactive, easy-to-use CD-ROM that lets children (and probably more than a few grownups with fond memories!) go straight to the directions they need. Blueprints lay out every step that goes into constructing a bank, barn, farmhouse, firehouse, frontier tower, multiple cabins, and much more. Photo Courtesy: PeopleImages/Getty Images To log in and start using Edpuzzle, you must first go online and register through its official website for an account. After the registration process, you can log in to Edpuzzle via the same website and start using its features. Edpuzzle is an internet-based interactive learning platform for educators. It provides an easy way for teachers to engage their students with videos. This free tool allows teachers to modify videos and use them as learning materials either for online classes or assign them as homework for students.Edpuzzle: A Quick LookEdpuzzle can be best described as being similar to a cloud-based video editing tool. What makes Edpuzzle unique is that its editing features were designed with educators in mind, allowing them to customize the videos for specific learning progression and objectives. Teachers can select from the millions of video lessons already uploaded on Edpuzzle. Teachers who have registered can use the videos already edited by teachers to use instantly as lesson materials or to modify and personalize them to help them connect better with their own students. Photo Courtesy: Jecapix/Getty Images Teachers who want to use their own material can upload videos from website sources like YouTube, National Geographic and TED. They can customize the videos by adding their own voice-overs and commentaries, embed assessment questions for students or add links to other related videos. Other features of Edpuzzle include curriculum-based content, functions to set deadlines for homework and projects and even functions to restrict their students' ability to fast-forward their assigned video lessons. As a formative assessment tool, Edpuzzle also comes with features that make it easier for teachers to track the progress of their students throughout the curriculum according to their scores. The dashboard for teachers on Edpuzzle displays other data that include the length of time it took for a student to complete an assignment and their scores on the quizzes that are embedded on the videos. Although all of these may seem nice and very helpful, why does Edpuzzle focus on videos? According to Edpuzzle, their emphasis on the use of videos as teaching and learning tools is based on a study that says 65 percent of students learn better with visuals and that 95% of students regularly view videos on YouTube. Edpuzzle is essentially empowering teachers to make the most of visual learning and let them track the progress of their students at the same time. According to the website, Edpuzzle was launched in 2013. Teachers have since uploaded around 8 million lessons to its video library that was accessed by 35 million students and with 70 percent of schools in the United States connecting with Edpuzzle in some way.How Do Teachers Sign Up for Edpuzzle?Signing up for an Edpuzzle account as a teacher is easy and is similar to the usual registration process of most other membership websites. After the sign-up process, it is important for teachers to verify the email addresses that they have provided. This allows Edpuzzle to validate the teachers' identity, protect their personal information and help them recover their account in case any of them forgot their passwords. Edpuzzle will also use the teacher's email addresses as a means to inform them about any changes or upgrades in the system. Photo Courtesy: damircudic/Getty Images In some cases, some teachers who are signing up may also need to provide proof of parental consent. Some U.S. states and regional laws require parental consent or consent from a child's legal guardian before any institution or individuals can disclose a child's personally identifiable information (PII) to a third party. This means that depending on the location of a teacher, he or she may need to provide proof of parental consent before inviting a student to an Edpuzzle classroom. Teachers may obtain proof of parental consent from their school or ask the student's parents directly for it. Links to templates of parental consents and permission slips are available on the Edpuzzle website's help and support section.Searching, Adding and Modifying Videos to Your Own LibraryAfter fulfilling all of Edpuzzle requirements, teachers can start looking for videos and personalize them for their lessons. On their Edpuzzle dashboard, they can begin adding videos to their account by clicking on "My Content," clicking "Add Content," and then selecting "Create Video." Alternatively, they can browse for videos from any of the channels on the left side menu to add to their lesson library. Photo Courtesy: eclipse_images/Getty Images If teachers from the same schools have used Edpuzzle in the past, teachers who have signed up can also use the same video materials by clicking on "My School." Edpuzzle's own channel, on the other hand, shows an expansive video collection of lessons that have already been edited by other teachers. From this channel, you can find videos that you can modify to suit your own lessons. You can also upload videos that you want to use and edit for your lessons from Khan Academy, YouTube, National Geographic and other similar websites. After finding a video or videos that you want to use, copy and paste it on the Edpuzzle search bar. Alternatively, you can add Edpuzzle's YouTube extension on your browser to add videos to your library easier. Once you have added the videos to your own library, you can start editing them to suit your online class and assign them to your students. Edpuzzle's How-to-Guides on its website provides easy-to-follow tutorials to help teachers familiarize themselves with the many features of the tool. It will be a good idea for teachers to make use of these tutorials to make the most of Edpuzzle's features. MORE FROM QUESTIONSANSWERED.NET You may be thinking about keeping a daily log book to record your health activities, what your baby is doing daily or your career goals. No matter the reason, there are several ways for accomplishing this. Use the following guidelines for how to keep a daily log book.Pick Out a Log BookPicking out a log book is fun for some and stressful for others. The main reason is that some don't want to mess up a pretty book and others love the idea of picking out a book they can start working in as soon as they get home. The idea is to pick out something that suits your style, that isn't too big in case you want to carry it with you and that has the kind of paper you like inside. For example, if you prefer ruled or unruled, look inside to make sure you're buying what you want.What Are You Logging?If you're setting up drivers daily log books, then you don't need anything fancy. A small notebook that fits into the glove compartment will suffice. However, if you're creating a more complex log book, you may want to look at log book templates to see how they're set up. Think about what you're going to track daily, why you're tracking it and the goals you want to achieve. You may also be tracking in this book to record past events and, if that's the case, make sure you're using archival paper and pens instead of pencil.Using Your Log BookRemember, this is a log book and not a journal. Keeping a log book differs from a journal in that you're not writing complete entries. Instead, you're compiling short lists of bullet points. You're going to highlight what you want to remember according to the theme of the log book. So, if you're tracking your health, you could log how many steps you took that day, your weight, you many glasses of water you drank and what you ate. You could also log any other exercise you completed, if you felt tired and how many hours of sleep you got the previous night.Should You Use an Electronic Log Book?If you're not a fan of handwriting, then an electronic log book may be the best option. The idea is to record your thoughts daily and, if that means doing so electronically, then you're still achieving your goal. You can print these logs out later if you want to have a paper copy of the log book later.The Benefits of a Log BookKeeping a daily log book is beneficial in many ways. One of the most significant ways is that, for those who want to keep a journal but can't seem to get into the habit, have an alternative. Log books are an excellent tool not only for tracking goals or data but also for remembering daily events. So, if you need to look back on something you may have forgotten, you can refer to your log book as a reference. MORE FROM QUESTIONSANSWERED.NET
